## Site analysis and concept

Kindergarten is a safe place for the child. It teaches children the basics of education in a fun and joyful way so that they can accept the other world, as it allows them to discover different motor activities in a distinctive way to discover their inclinations and mental abilities that help the child to acquire talents, the ability to learn, adapt to the external atmosphere, and deal with new people far away. around the house. Faroun's village lacks a kindergarten that includes the village kids, so it was appropriate to design a kindergarten For them, it includes a kids club surrounded by green spaces.

Choosing the rectangular shape because it means balance and stability between the child And choosing the shape of the circle because it means protection and safety for him

Dividing the rectangular block into three areas: the entrance and the reception functions of the block from the entrance administration and halls, and placing an intermediate corridor between them.

Take out three axes from the center of the circle to divide the three groups in the kindergarten according to the age stages.

After determining the locations of the circles, make circles around the centers with the radius of the classrooms.Determine the location of the stairs, entrance reception and kids club halls in the rectangle.

Determine the location of the outdoor playground and the indoor playground in the circle and establish a variety of games, in that they are curved in proportion to the rectangle and the circle, so that they add vitality to the child.

Determine the locations of other rooms such as bathrooms and the teachers' room, Adding another floor overlooking the outer playground, containing the teachers' rooms and the children's club halls, in addition to two balconies for the teachers to rest.
