## General Overview

The purpose of this project is to study and develop an android application called ' Future of Shop Furniture ' with the use of Augmented Reality technology for design and decoration that will help customers visualize how furniture pieces will look and fit (to scale) in their homes and also can provide details of products to support customer decision.

Moreover ,Combine buying with entertainment.

## Benefits :

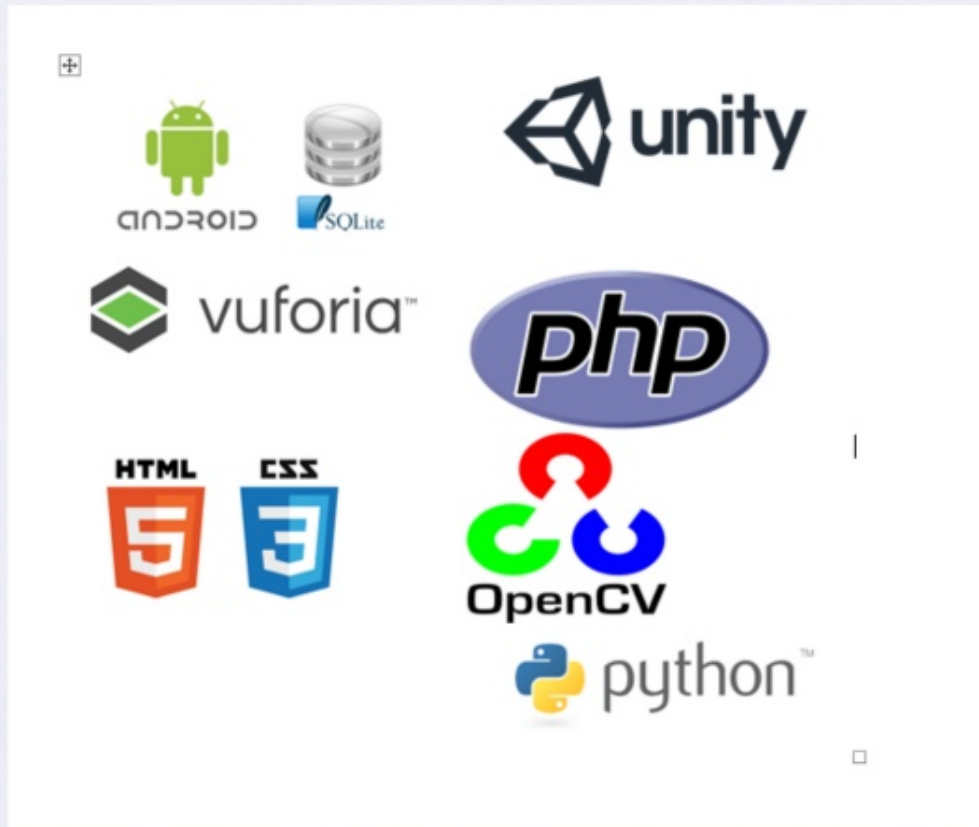

Using augmented reality applications **Businesses** can:

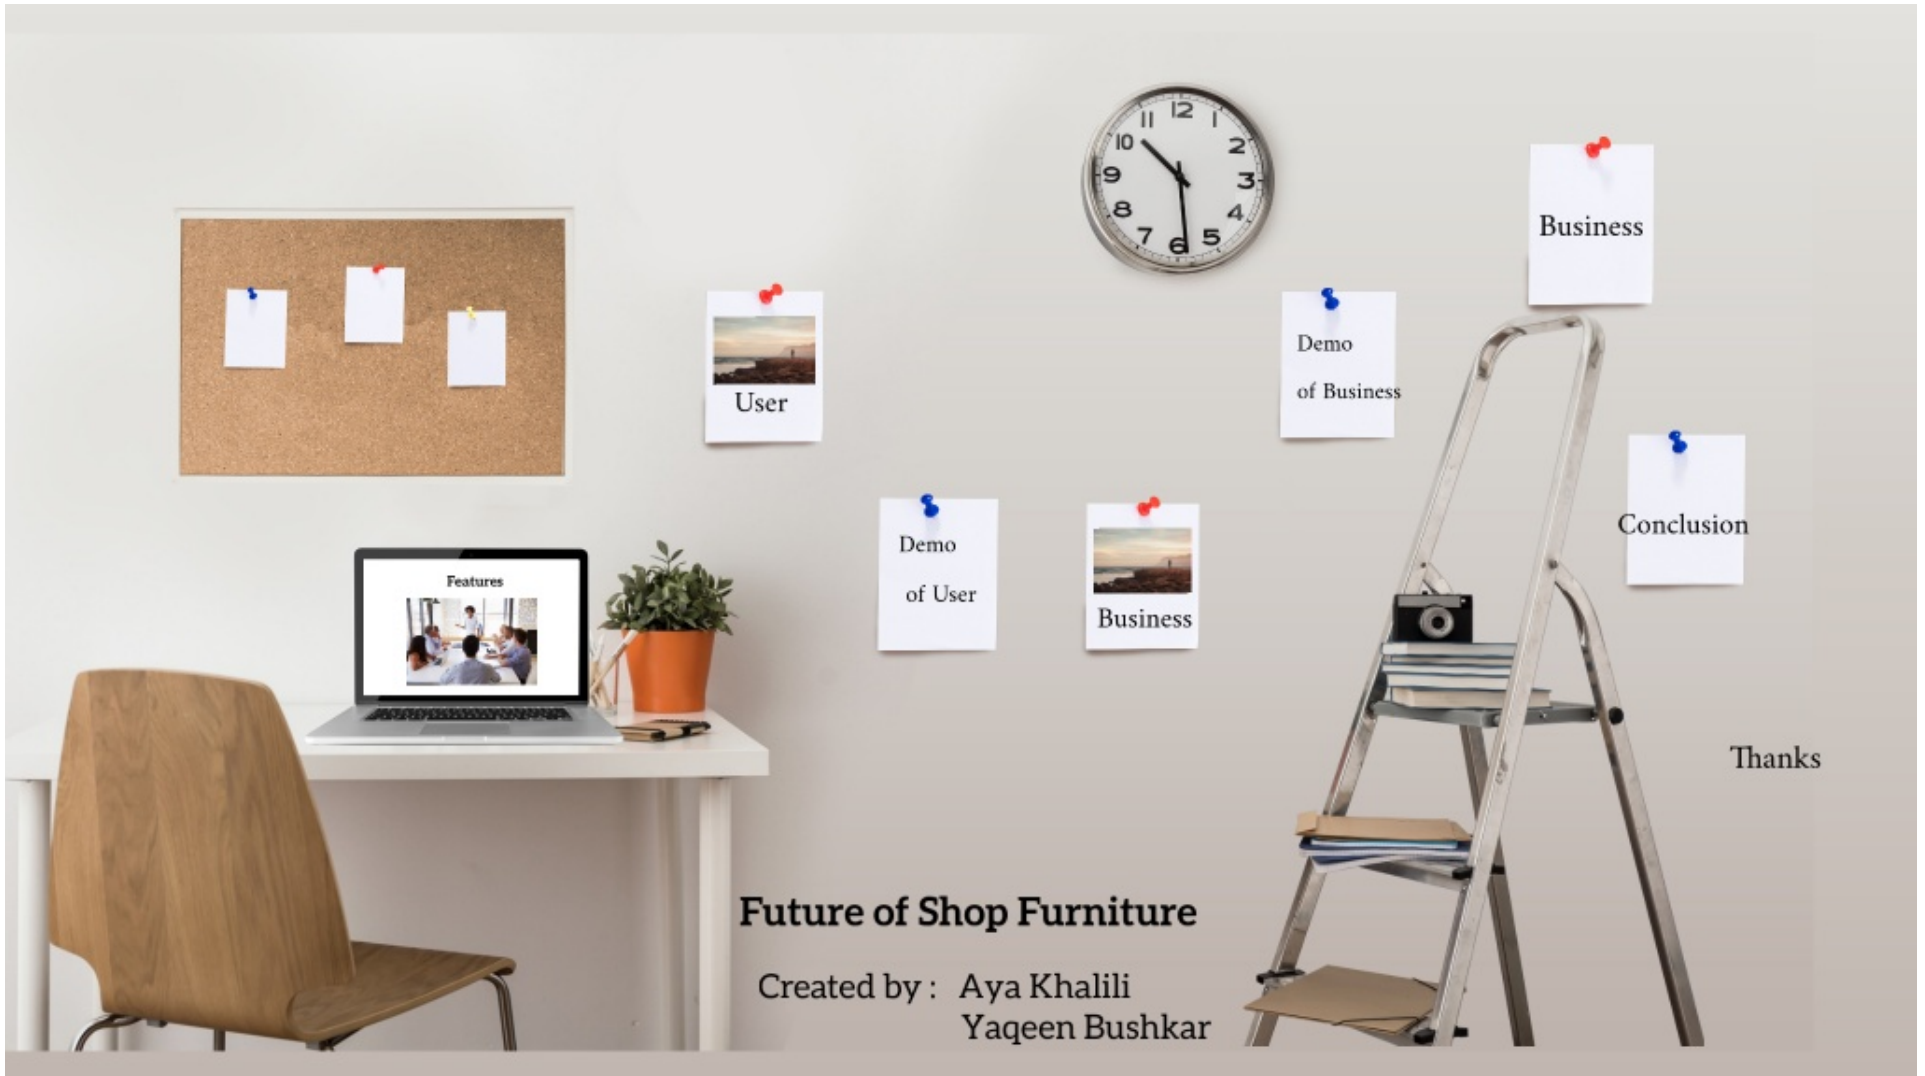

- Entertain and amaze customers
- Engage and retain customers
- Be ahead of the competition

While **customers** can enjoy AR tools in such ways as:

- Find and try products remotely
- Explore brand new ways to shop
- Making more informed purchasing decisions
- Combine buying with entertainment

# Tools and Technologies :

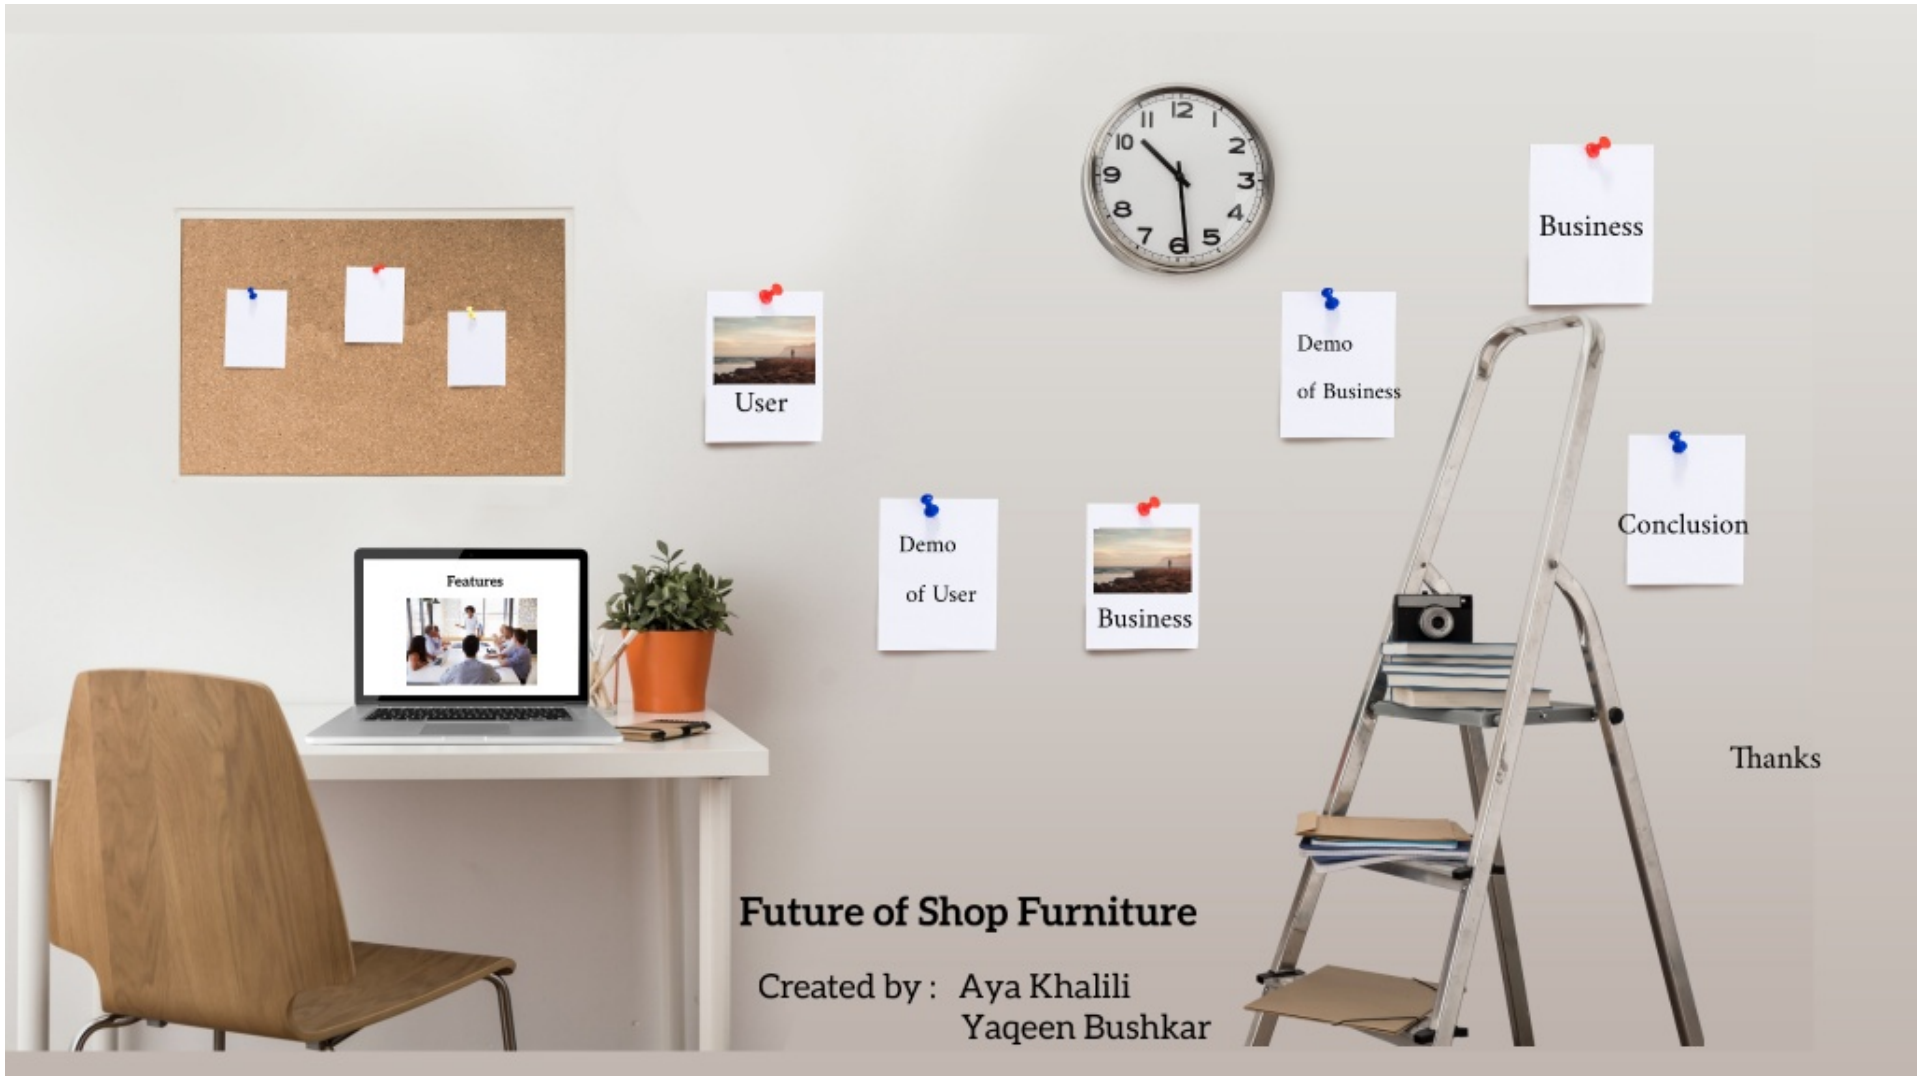

# Features

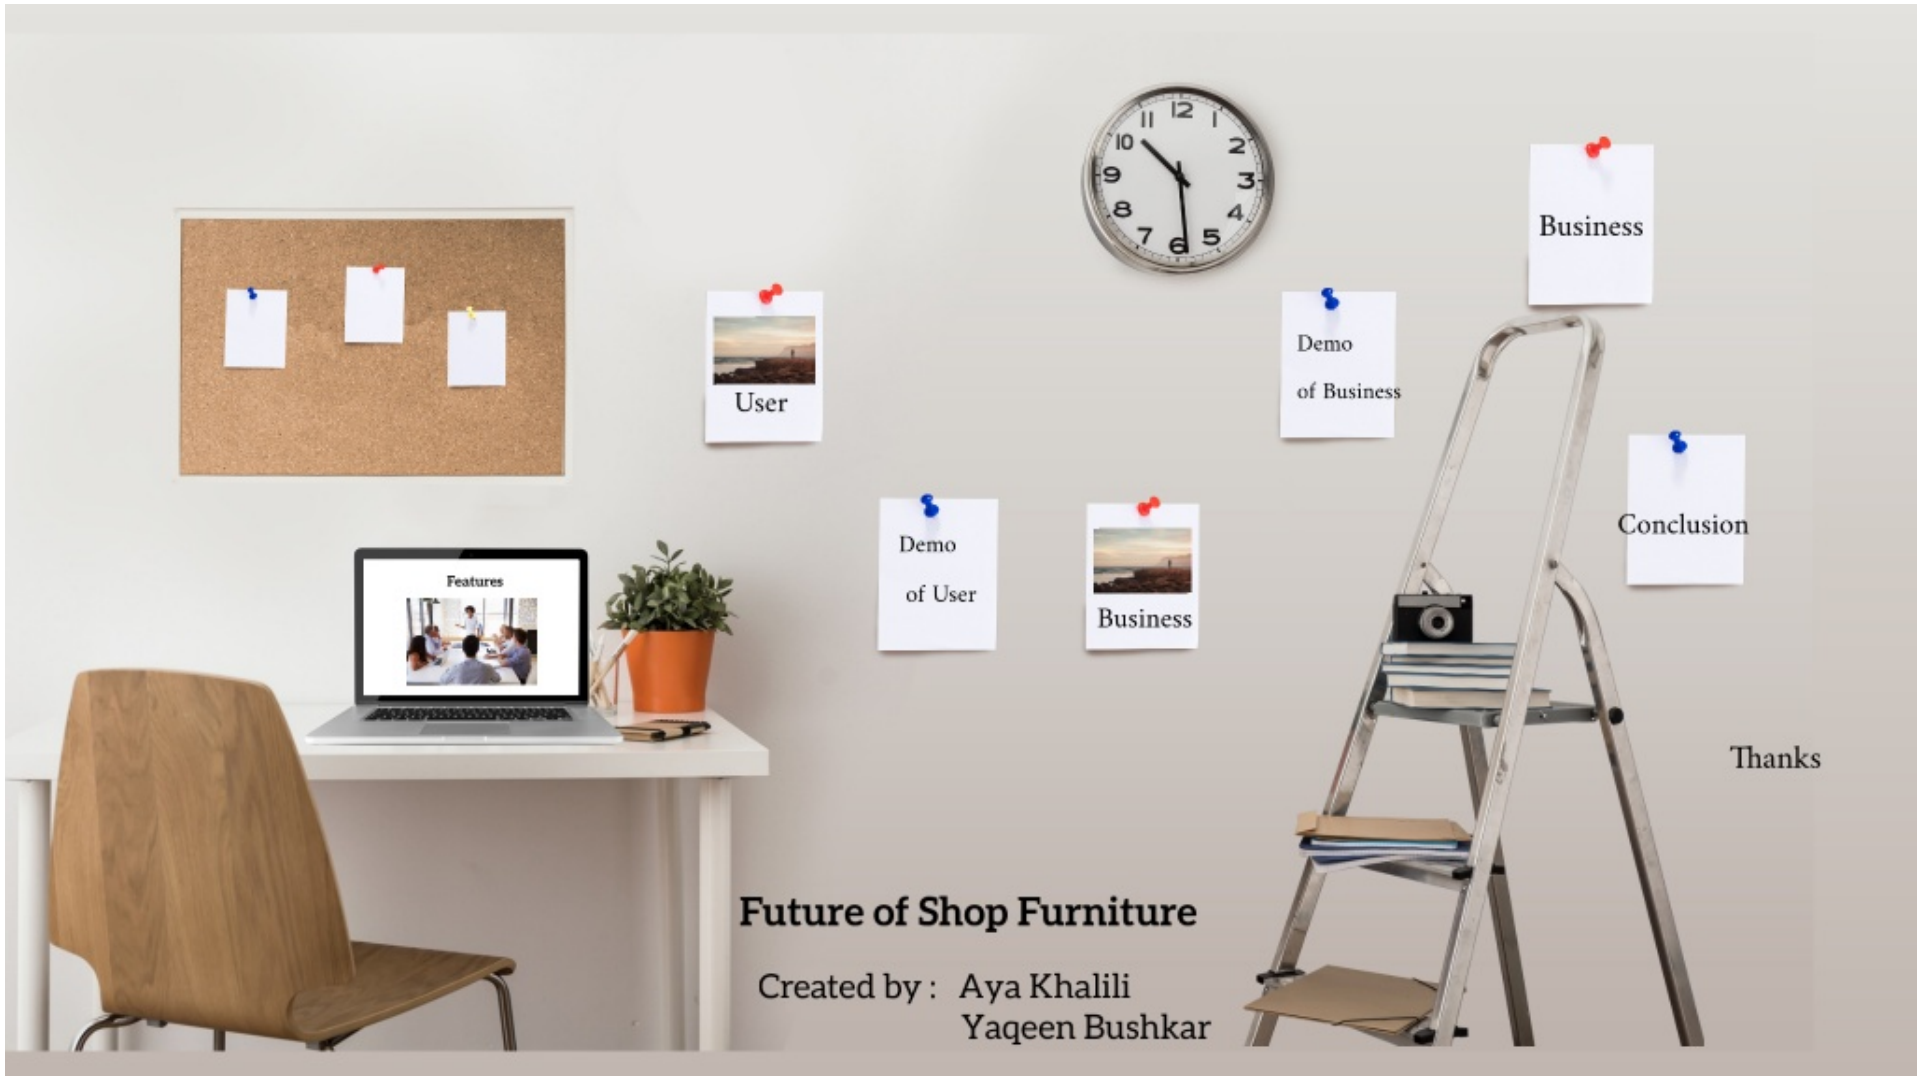

Includes two parts, one for administration and the other for user.

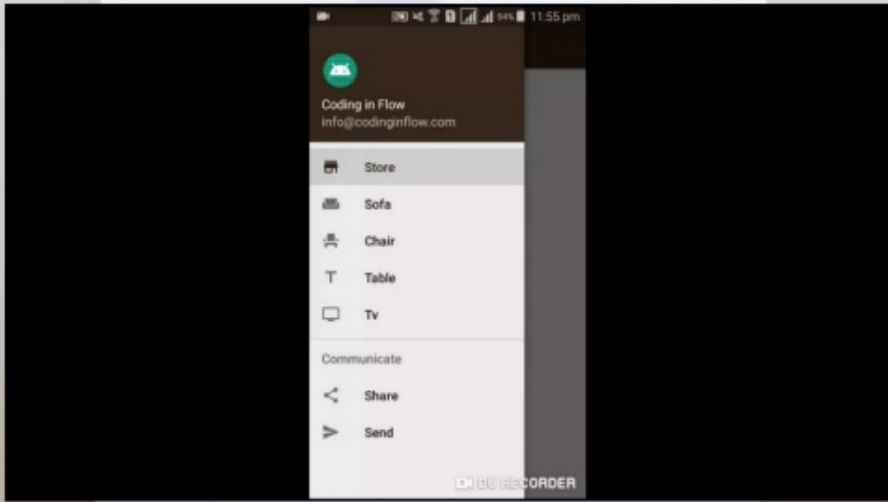

## For User

This App allow user to search for Furniture by its name or name of store , also can try any piece on his home to decide if good or not .
