Outline

About CloudMerchant

CloudMerchant is a dynamic mobile application that revolutionizes the selling and display of products, especially products that are handcrafted with love.

CloudMerchant: The application contributes to helping this category promote their products, facilitate the sales process, and make their products reach the largest sample of buyers

The Problem

Many handicraft owners find it very difficult to promote their products, and this causes them to obscure these skills and not develop them optimally. Hence, we came up with the idea of this application to contribute to creating an environment suitable for those in these professions.

Our Solution

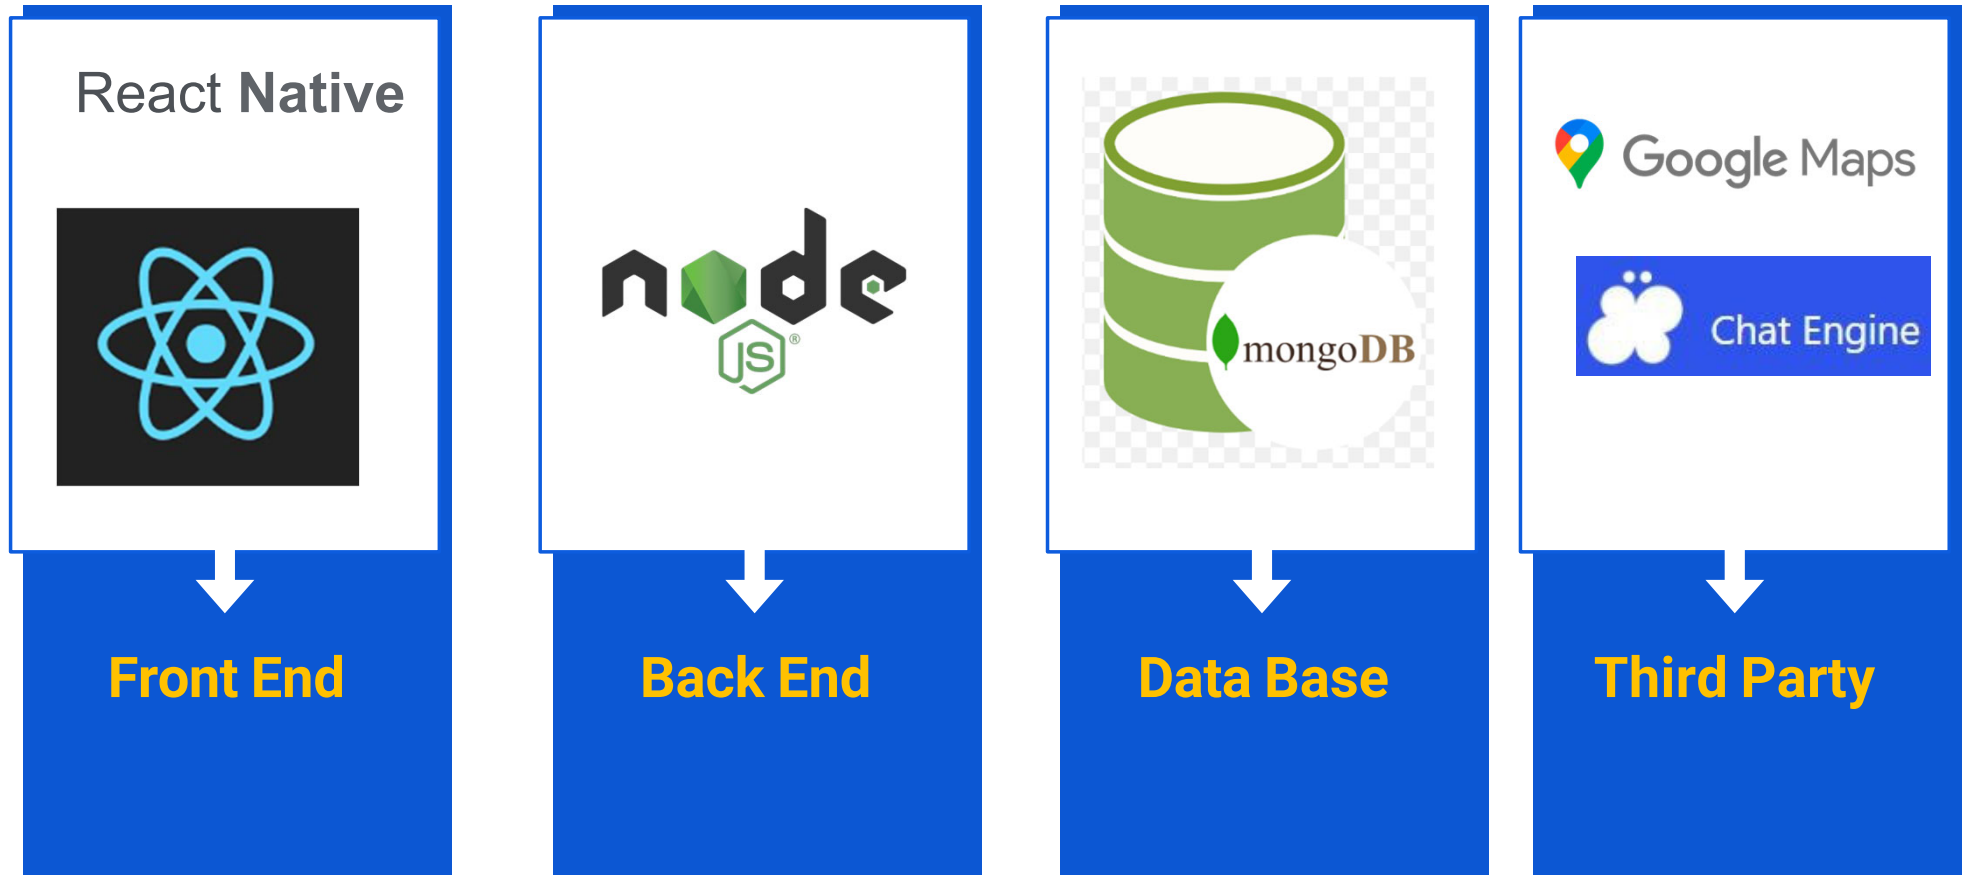

The application came to provide the ideal solution for **handicraft owners** It creates a place for them to meet, and each **seller presents** the products that he has and wants to offer for sale. There is also a **buyer** who **reviews** the **content of the application** and can choose the product that suits him and buy it. The application also distinguishes itself by providing ease of **delivery** and ease of communication with the seller through the messaging feature. inside the app

Target Groups

Wenak app targets **three main groups**: 1- Buyer 2- Seller 3- Driver

Technologies

CloudMerchant designed to function seamlessly across various devices including mobile phones, and tablets, offers key features that enhance user experience and accessibility regardless of the device used.

1's Category: Seller

The CloudMerchant : The seller enters the following requirements and also enters pictures of the products that he will offer for sale within the application.

Themes & Languages

The **CloudMerchant** app's settings allow users to type in multiple languages and search through categories

Future work

Host **Cloud Merchant** on AWS and launch the app on Google Play and Apple Store.

Add payment options like PayPal, and Jawal Pay .

Enabling the general public, such as bicycle owners, to provide services on Cloud merchant.

Thank You
