What is JobsHub

JobsHub is a application that deals with companies and people who are looking for job .

Motivations

Many companies suffer from problems when offering a job, as hundreds of people apply for one job even if they do not match the required requirements, and this takes a long time when filtering the CVs by human resources.

I'm excited to announce that I have recently been promoted from a part-time QA Engineer to a full-time QA Engineer position at Foothill Technology Solutions. In my new role, I will be responsible for ensuring the quality of our software products by designing and executing test cases, identifying and reporting defects, and collaborating with the development team to resolve any issues.
