

Our Wedding

WEDDING PLANNER

Suprvisor: Dr.Sufyan Samara

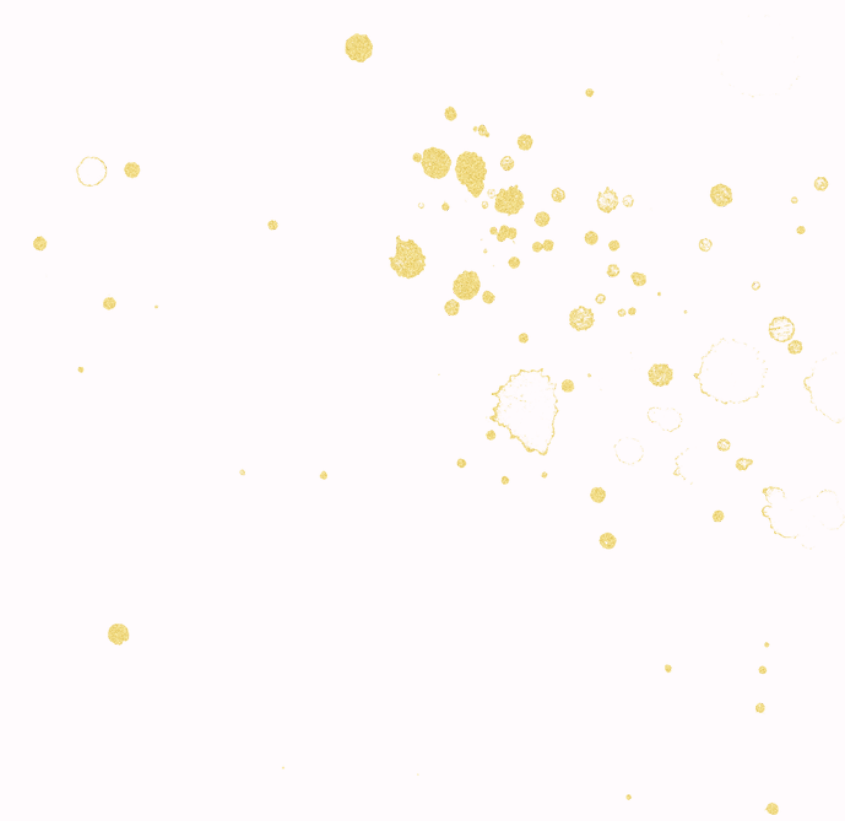

Students: Rose Barakat, Roa'a Sawalmeh

Motivation

-Sometimes groom and bride find it difficult to find a suitable hall that meets their needs in terms of price, location and the number of people invited.

-They also have to go and ask for available days and the services that the hall provide. So they spend time and effort for that.

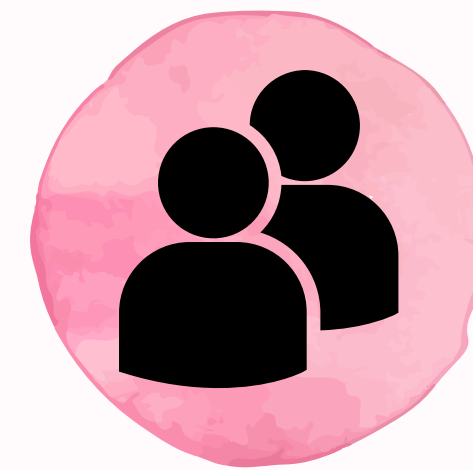

Groom and Bride usually search a hall
for their wedding in terms of:

Location

Price

Number of invited
people

Our application:

Our project has many features that benefit halls' Owner + halls' seeker.

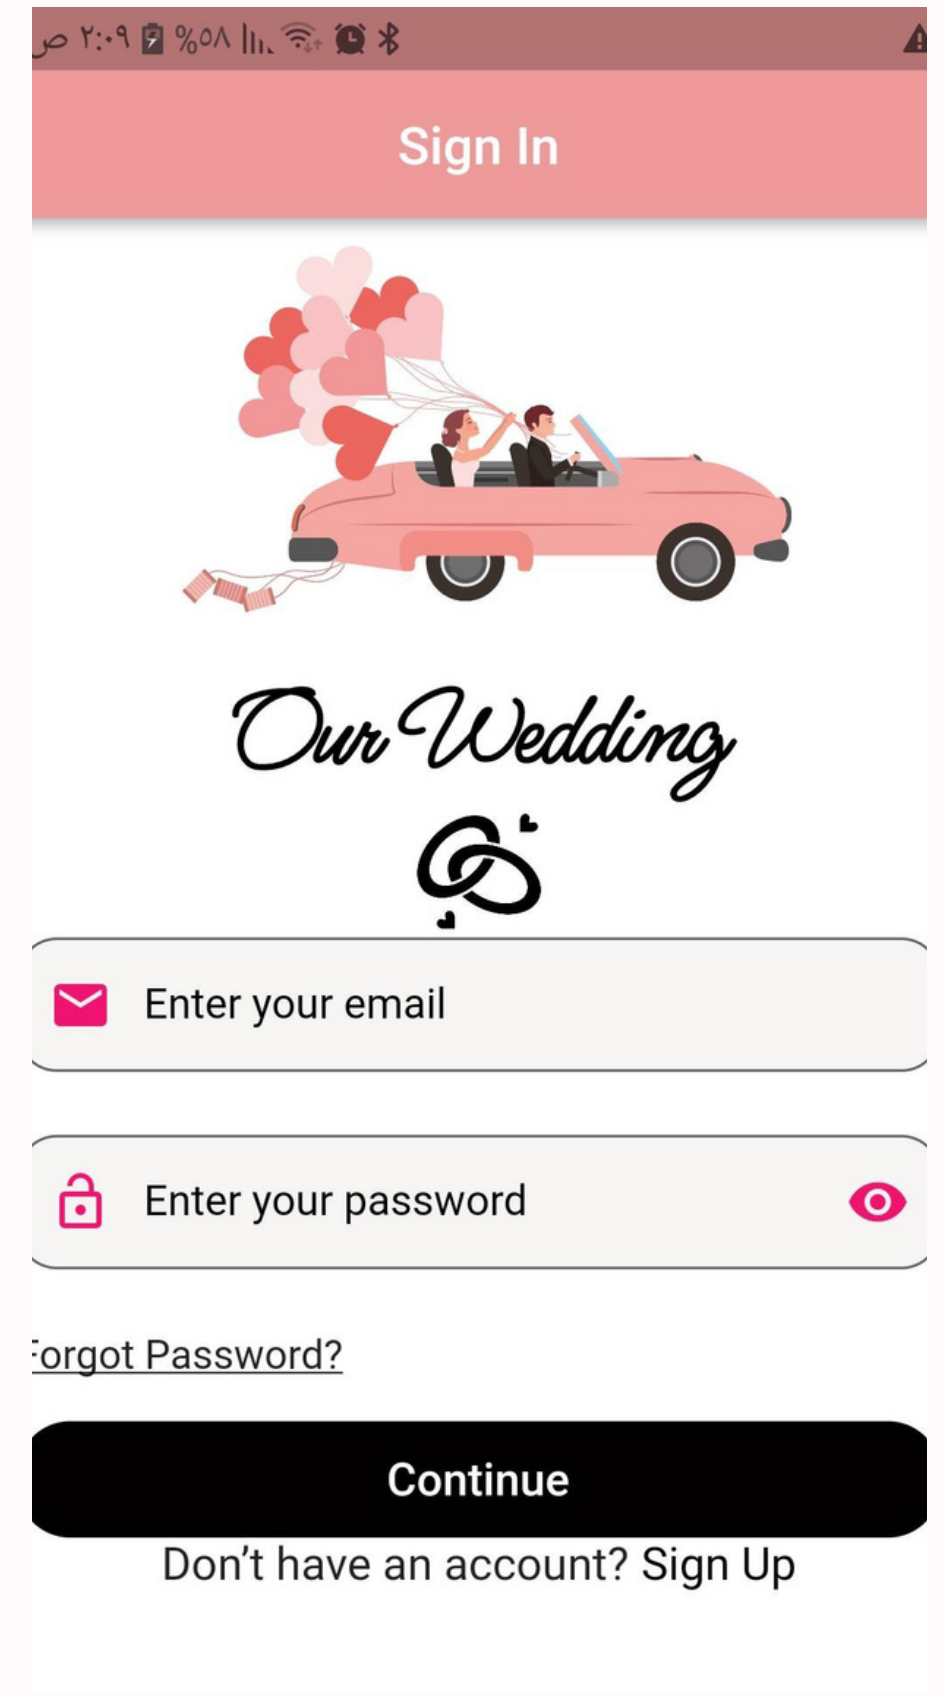

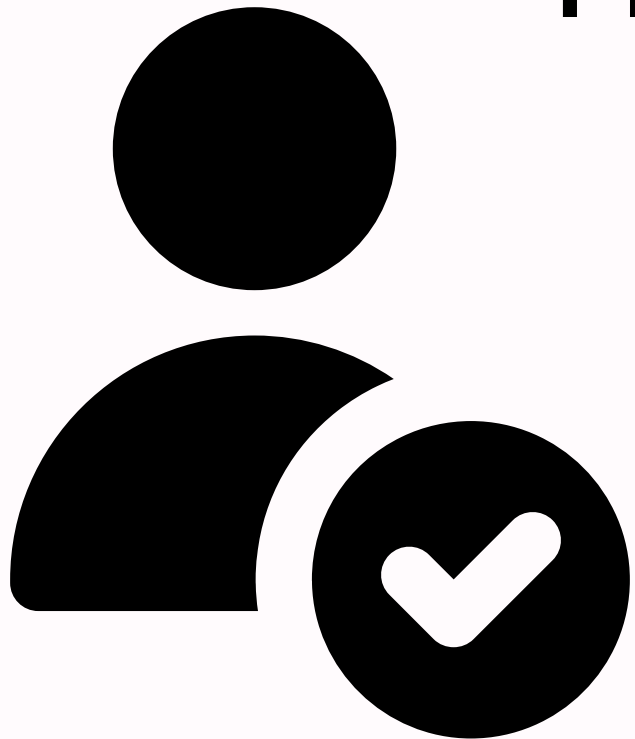

For normal Users: they can see all the available options, choose and reserve the halls that suites them.

For Halls' Owner: it make it easy for them to reach a larger number of people, see all the reservations, and see all the services that the customer requested in one place in an easy way.

Features:

1. Halls' Owner + Halls' seeker can make accounts via signup and then login to the application easily with authentication.

Features:

-There is a sign up page for Halls' Owner and another one for Halls' seeker.

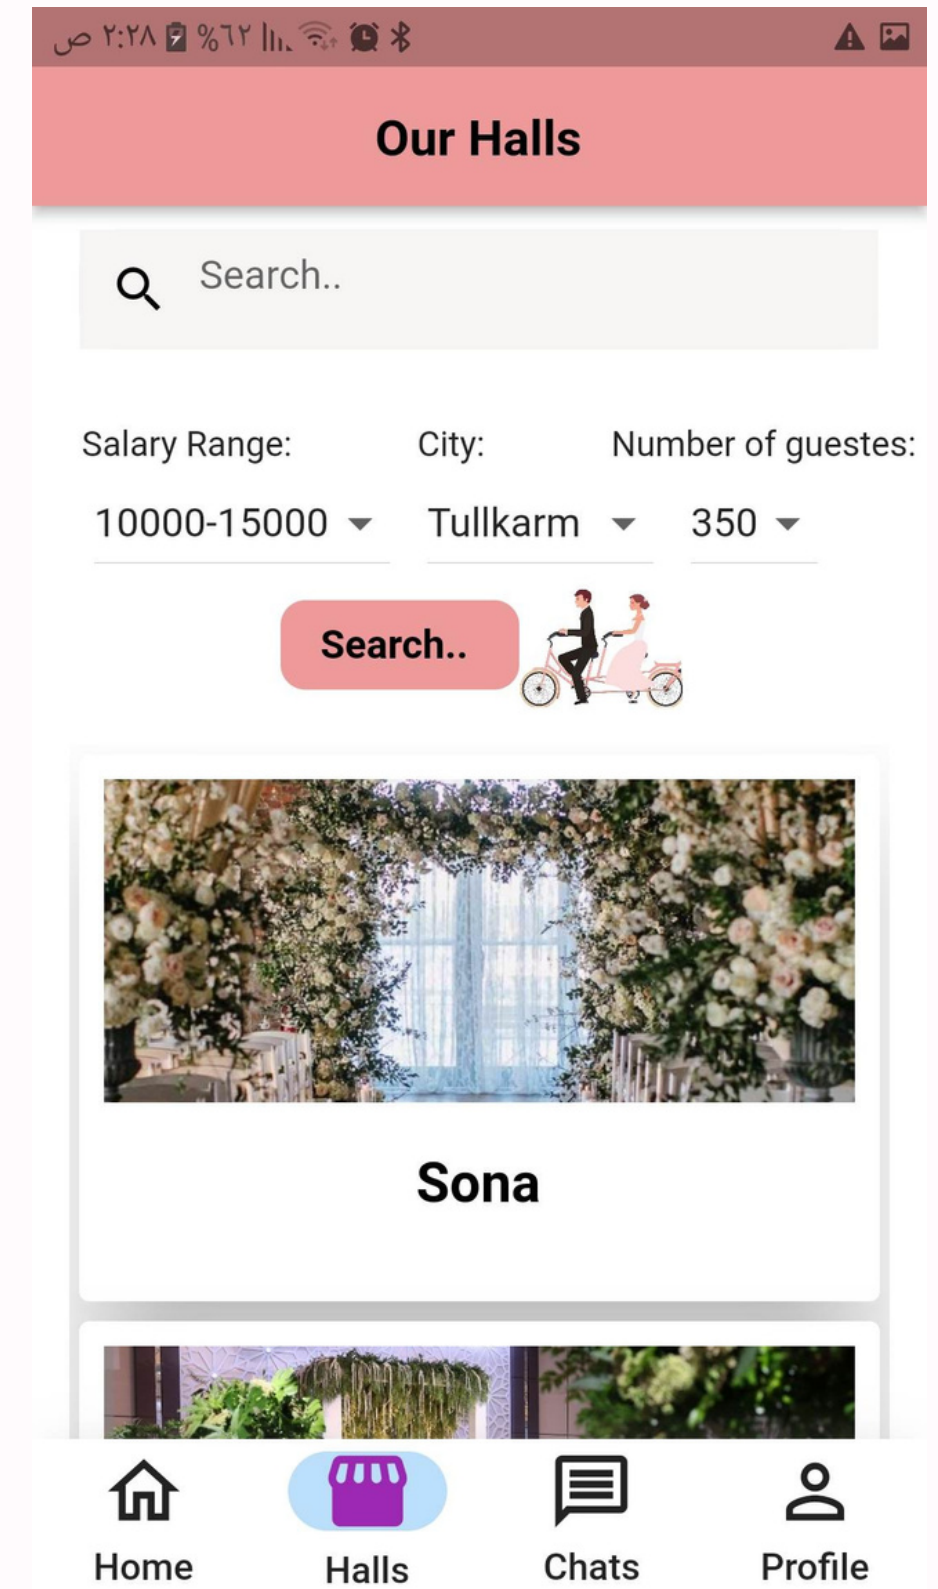

-For Halls' seeker: he/she need to enter his/her name + email + city and password.

-For Halls' Owner: he/she need to enter more information like contact information +address + google map location+ Capacity of the hall and the price range.

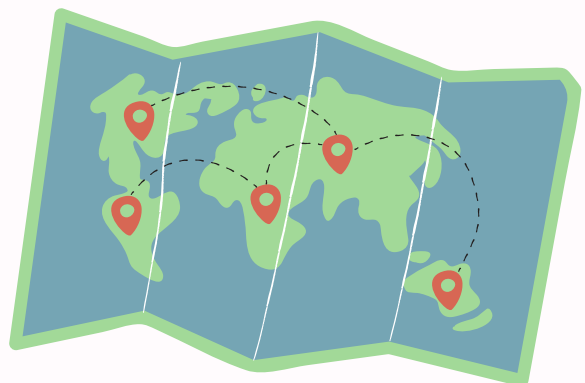

Features:

2. Normal users can see all the halls, filter them according names, price ranges, location and the capacity of the hall.

Features:

3. Normal users can see a map for the halls with the 3 determinants via a form that they should fill.

both Halls' Owner and Halls' seeker can send a feed back to the Admin.

A screenshot of a mobile application interface. At the top, there is a red header bar with a back arrow on the left and the text 'Contact us' in the center. Below the header is a large illustration of a funnel filled with orange and green items. Underneath the funnel, the text 'Send us a message/feedback' is displayed. Below this text is a large, light gray rounded rectangular input field with a purple pencil icon on the left side. At the bottom of the form is a black rounded rectangular button with the word 'Send' in white text. The top of the screen shows a status bar with various icons and the time 9:07.

Features for admin:

1. He/She can see all the halls, search using names and delete any hall.

Features for admin:

2. He/She can see Halls' requests, Accept or reject to join the application.

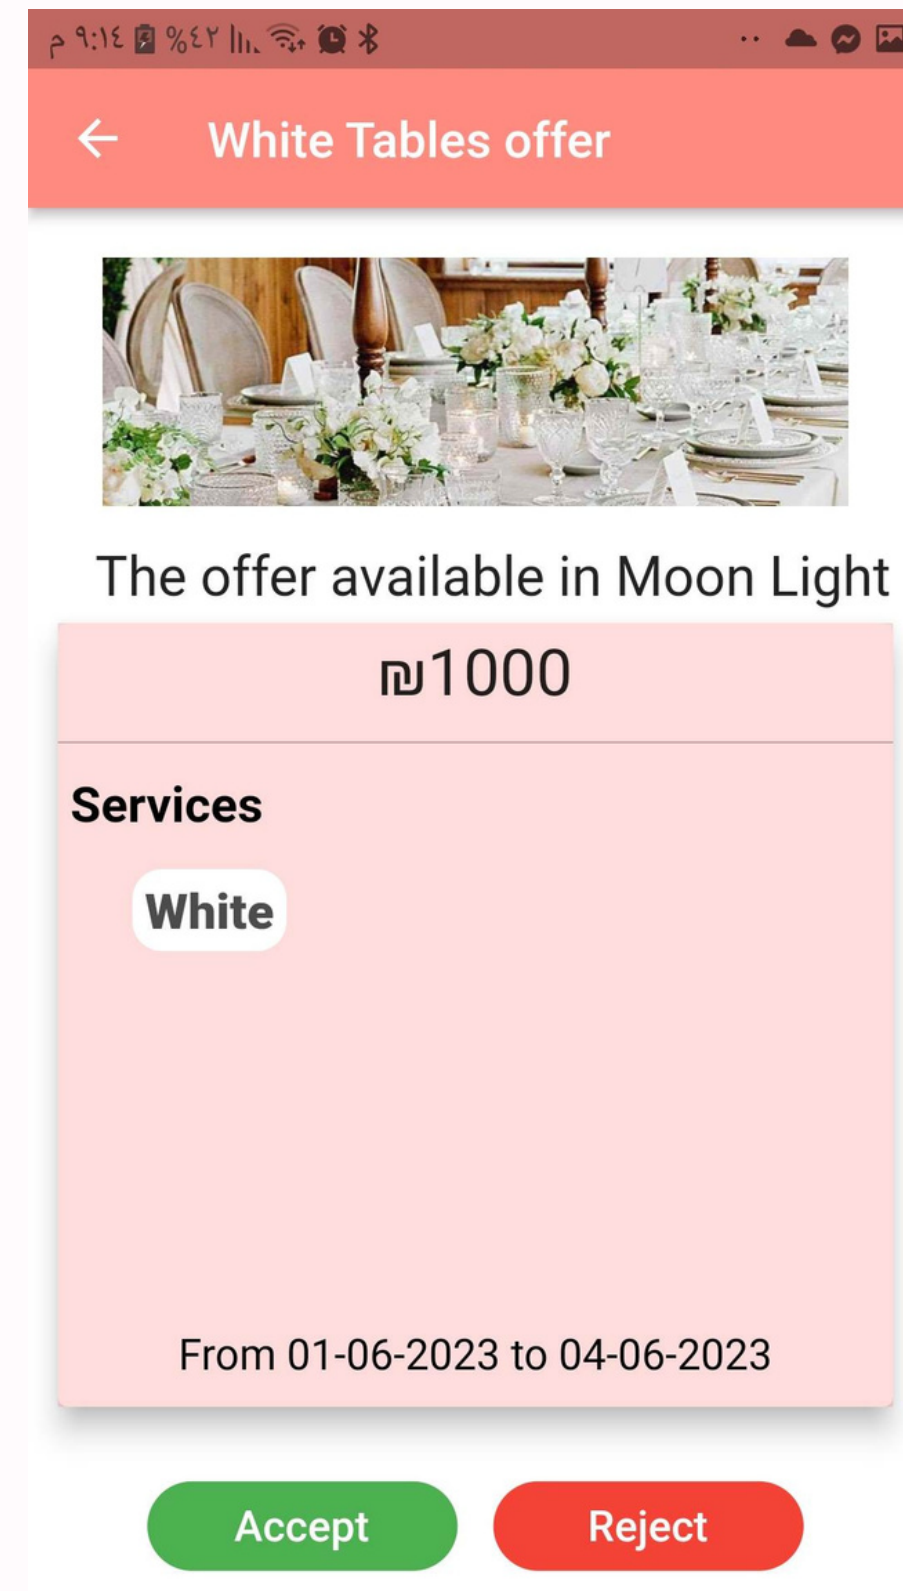

The screenshot shows a mobile application interface for a hall named 'Farah hall'. At the top, there is a red header with a back arrow and the text 'Farah hall Hall details'. Below the header is a circular profile picture of the hall and the name 'Farah hall'. The main content area is divided into several sections: location (Nablus, Nablus) with an email icon and 'Email farah20@gmail.com'; opening hours (04:00 PM - 11:30 PM) and excluded days (Sunday); halls' capacity (500) and price (\$ 15000-20000); and a phone number (326594) with a 'Call' button. At the bottom, there is a 'View location in google maps' button and two large buttons: 'Accept' (green) and 'Reject' (red).

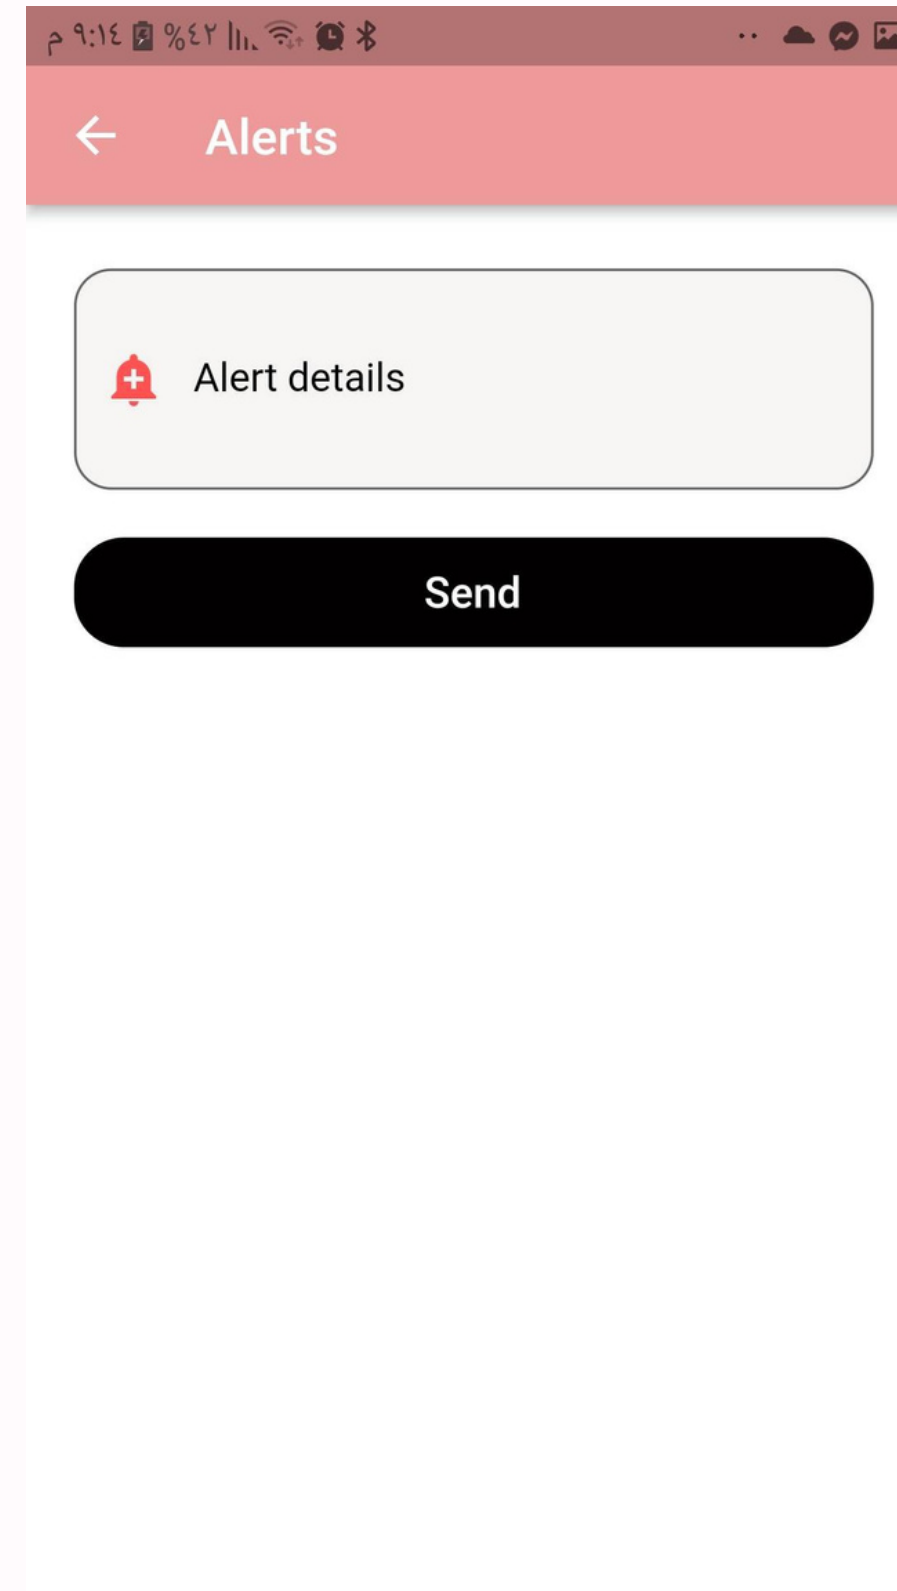

Features for admin:

3. He/She can see offers' requests, Accept or reject.

Features for admin:

4. He/She can send alert or notification to the users.

Future Work:

- 1- Adding new type of users for example: Party coordinators, Cake restaurant owners and make Networking with hall owners**
- . 2- Nearest hall for the users using google API.**
- . 3- Developing it into a social networking app with followers and posts.**
