

Urban Environmental Planning *“Eco-City”*

By:

Mutaz Sama'neh

Under Supervision of:

Dr. Zahraa Zawawi

Dr. Ali Abd Al-Hameed

What is an Eco-City?

- Ecological cities enable their residents to live a **good quality of life** & environment while **using minimal natural resources**; and to **incorporate the environment into the city**.
- To ensure applying the concept of the Eco-City, specific criteria should be available in Micro & Macro level.

Criteria on Macro-Level

- Availability of Natural Resources.
- Proximity of Biodiversity.
- Available of Agricultural Lands.
- Level of protection (Land Sensitivity).

Criteria on Micro-Level

Component	Criteria
Form	<ul style="list-style-type: none">• Applicability the Concept of Compact City (Density)<ul style="list-style-type: none">• Availability of open spaces
Natural Elements	<ul style="list-style-type: none">• Availability of Natural Elements• Accessibility to biodiversity for recreation<ul style="list-style-type: none">• High sensitivity of pollution
Economy	<ul style="list-style-type: none">• Availability of agricultural lands• Existing potential for Agro-industry
Transportation	<ul style="list-style-type: none">• Acceptable slope of streets• Applicability of walkability

Principles of “Eco-City”

- In order to reach the concept of the “Eco-City”, **Ten Principles** should be achieved and applied.
- Applying these **Principles** can ensure a safe move towards the “**Eco-city**”.

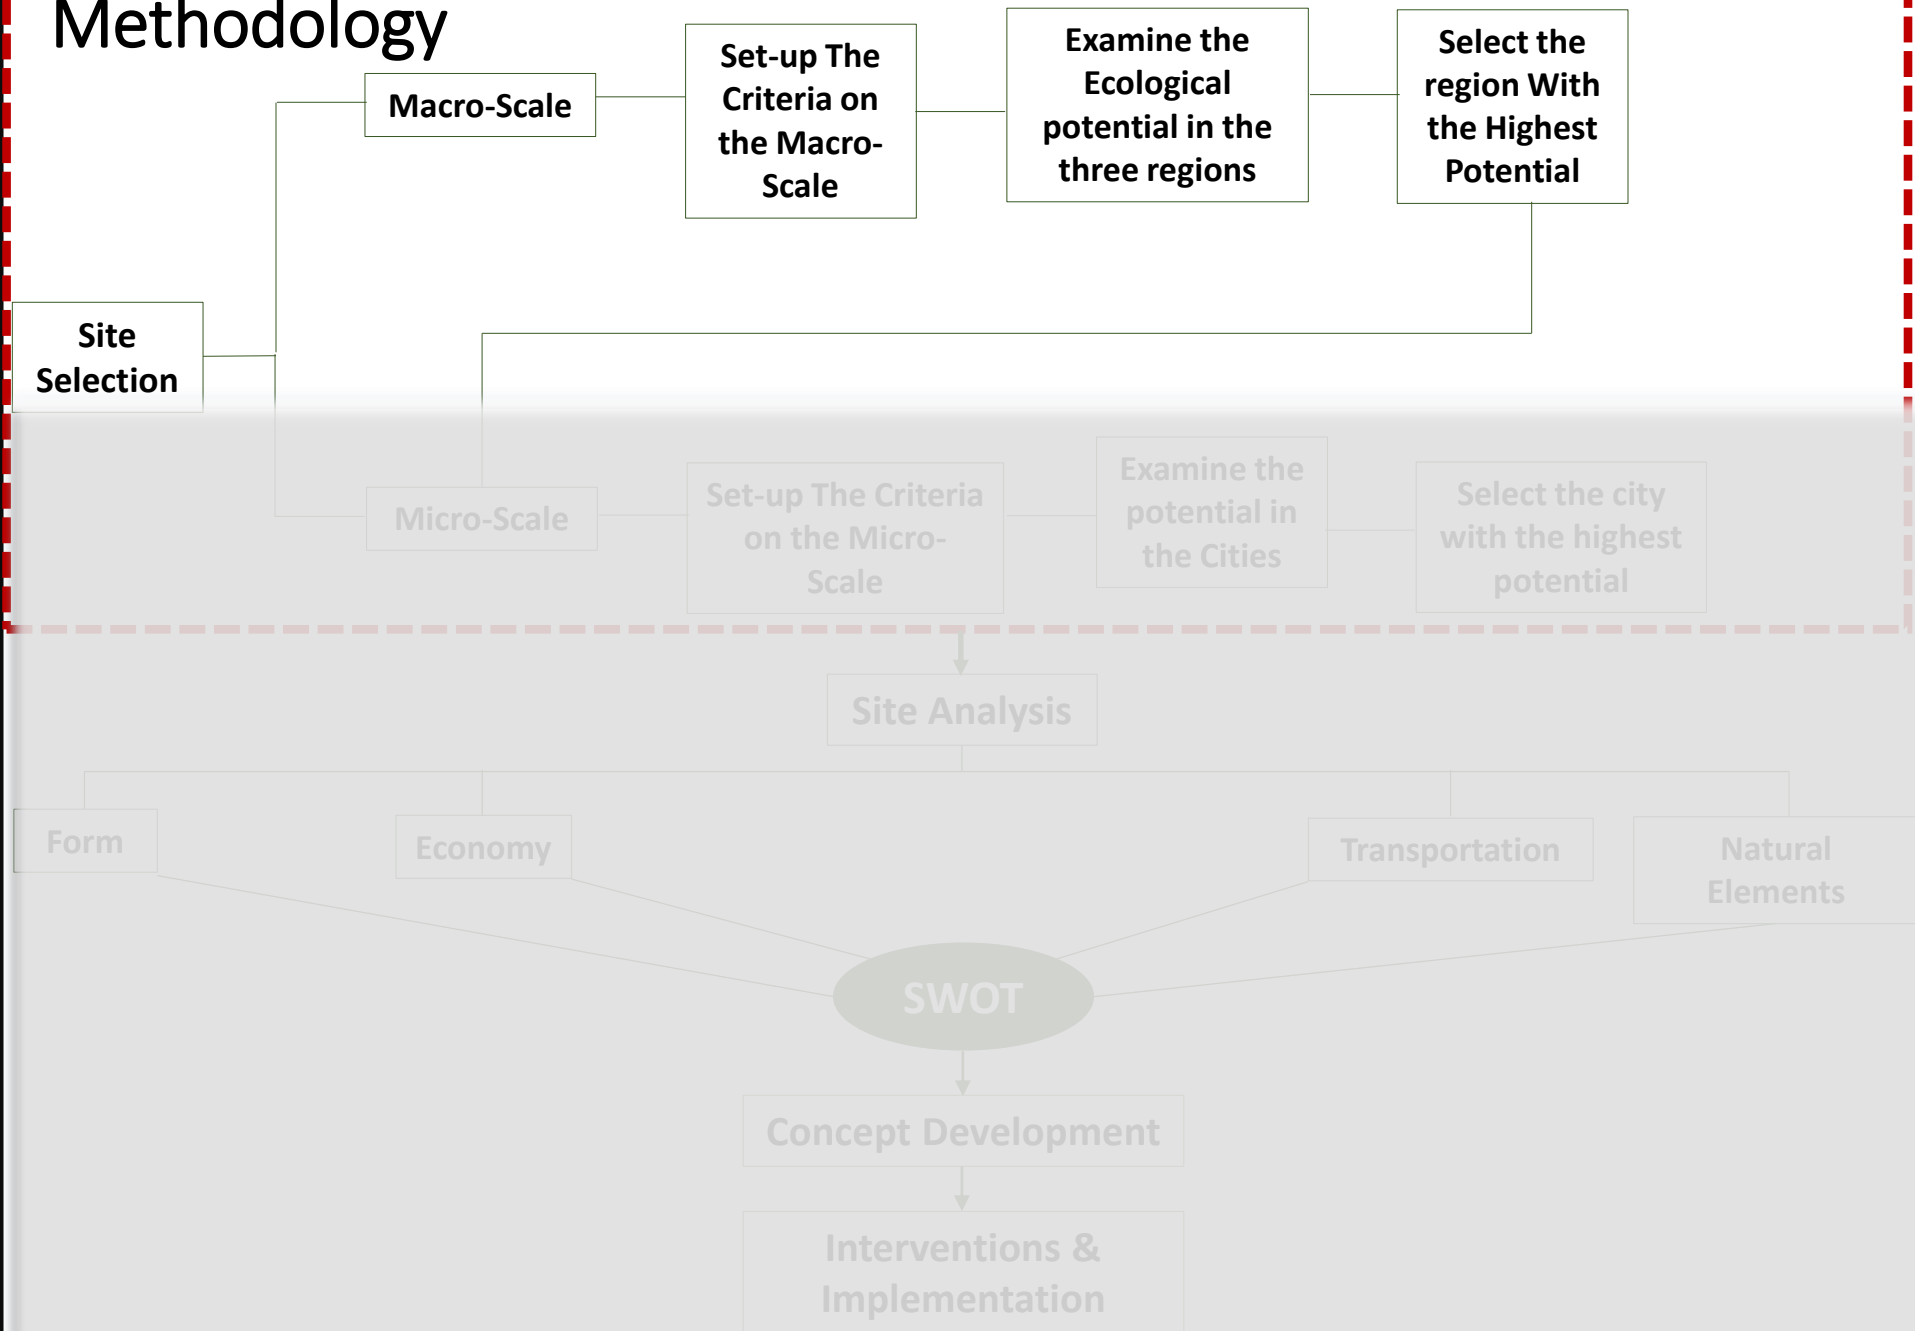

Ten Principles of the Eco-City

1. **R**estore Degraded Land.
2. **F**it the Bioregion.
3. **B**alance Development.
4. **C**reate Compact Cities.
5. **O**ptimize Energy Performance.
6. **C**ontribute to the Economy.
7. **P**rovide Health and Security.
8. **E**ncourage Community.
9. **P**romote Social Justice and Equity.
10. **E**nrich History and Culture.

An aerial photograph of a city, likely Jerusalem, showing a dense urban landscape with numerous buildings and green spaces. A semi-transparent dark horizontal band is overlaid across the middle of the image, serving as a background for the title text. The text is white and centered within this band. The city below shows a mix of low-rise and mid-rise buildings, with some larger structures and a prominent tower visible in the distance. The overall tone is historical and academic.
