JENIN CULTRUAL CENTER

AHMAD ABUALROB

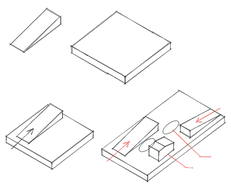

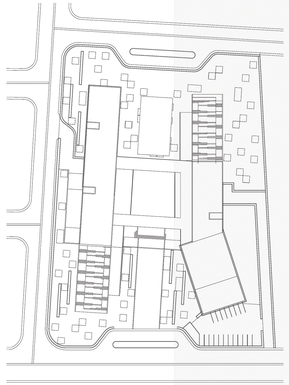

CONCEPT

The shape was divided so that it became a large entrance and spaces that included the activities of the people of Jenin camp, in contrast to the narrow building in the camp, so that people were taken out of the camp atmosphere and the harassment to which they were exposed to a social and interactive atmosphere. This was done by creating seating chairs and a special area for play and interaction. The project aims to All ages because it contains jobs for all groups

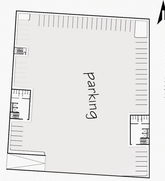

The Ramb was treated as an idea that indicates the adherence and rootedness of the people of Jenin, and the shape emerging from the ground continuously gives a feeling of strength and flow. The Ramb is intended for people with needs, in addition to something similar to an amphitheater for public events.

SITE PROJECT

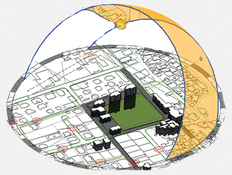

The project is located in northern Palestine, in the city of Jenin, specifically near the Jenin refugee camp

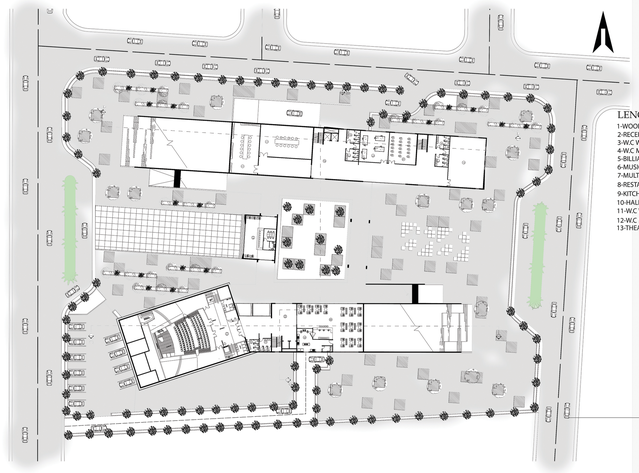

The land is located 900 meters west of Jenin city center, on a main road near the entrance to Jenin camp on the northern side. The site is surrounded by several hospitals, including the government hospital and Al-Amal Hospital, several schools, and government buildings, in addition to residential and commercial buildings, and mosques. The project's land area is 17,500 square meters. The building area on the land is 12,000 square meters
