Project title: "Creative Design"

Academic Year: 2020/2021

Group Members: Ali Moalla

Department Name: computer engineering dep

Hadi Jml

.....

.....

Project Type **Software** or Hardware (Choose one)

Supervisor Name: Asmaa Afeefi

Format:

- Single space, Times New Roman.
- 12 pt,
- Maximum 1 page.

Abstract Body:

Items must be provided in the Abstract:

- Why do you think this project is important? Please explain the significance of this Project in brief.
- In your point of view what are the important aspects that should be covered in the project?
- Objective(s): In your view, please explain the main objectives of the project.
- Methodology: Give a brief outline of the application development process.
- Had this project been done before? Are there any similar applications available today?
- **Note:** Please deliver this abstract early to ensure that your Project has been approved by the department's projects committee. **Registration will not be done without this approval.**

Project's Abstract:

Decoration is considered an important thing because it's creating the background for the best life you can have. Decoration can be life-enhancing. It can make dinner parties more fun, kids happier, relaxing easier, etc. And to think, decorating is often considered frivolous. Making a charmed and happy home is a noble endeavor.

Our graduation project which is a platform (web and mobile application) about an online shop for a wood decoration shop business, this will help people from any location to order, pay and get any item of this shop online without any direct contact, this platform will provide the customers to view the items, and choose its properties such as the wood type, the colors, the text that the customer want and the font type. And this platform will also provide a Chatbot that will gather information from customers who needs help and sends them to one of the owners. And it will calculate and show statics to the owners like which item was ordered the most and it will have a recommendation system for customers to help them what to choose based on the statics etc. Also we will be adding forums to the site to make it easier to handle the inputted data and do the suitable process for it.
