Project Type Hardware

Supervisor Name: Dr. Aladdin Masri

Format:

- Single space, Times New Roman.
- 12 pt,
- Maximum 1 page.

Abstract Body:

Items must be provided in the Abstract:

- Why do you think this project is important? Please explain the significance of this Project in brief.
- In your point of view what are the important aspects that should be covered in the project?
- Objective(s): In your view, please explain the main objectives of the project.
- Methodology: Give a brief outline of the application development process.
- Had this project been done before? Are there any similar applications available today?
-
- **Note:** Please deliver this abstract early to ensure that your Project has been approved by the department's projects committee. **Registration will not be done without this approval.**

Issue number: GP1-4

Project's Abstract:

Almost all elder people take multiple medicines at different times of the day and they need to take them at the exact times of the day to take effect for that, they need to remember what times to take their medicines or have someone to keep track of when to take them. My project aims to help elder people take their medicine on time and also keep track of their health and vital signals by storing their medications in one place and then giving the person his medications at the right time of the day and also sending them notifications when to take them and also when they are late to take them it sends both an alarm from the device and a notification to the mobile app moreover it also gives the caretaker (family member, nurse) a report about the person vital signals in a weekly and monthly basis.
